

Polymer and Fiber Engineering 2008 Fall Seminar Series

August 19 Dr. Jong Wook Hong

"Nanobiotechnology and nano/microfluidic Systems"

Assistant Professor, Materials Engineering

September 2 Dr. Mark E. Byrne

"Structural and Molecular Biology in the Rational Engineering of Drug Delivery Carriers"

Assistant Professor, Chemical Engineering

September 16 Dr. Hareesh Tippur

"Dynamic Mixed-mode Fracture Behavior of Functional Graded Materials"

Alumni Professor, Mechanical Engineering

September 30 Dr. Virginia Davis

"Fluid Phase Processing of Cylindrical Nanomaterials"

Assistant Professor, Chemical Engineering

October 14 Dr. Vijaya Kumar Rangari

"Nanocomposite Materials for Structural Applications"

Center for Advanced Materials, Tuskegee University

October 28 Hassan Kocer

Title to be announced

Grad Student, Polymer and Fiber Engineering

November 11 Meisha Shofner

Title to be announced

Assistant Professor, Textile and Fiber Engineering, Georgia Tech.

Seminars held at 3:00 pm in Textile Building Room 104

**Refreshments served and an opportunity to meet the speaker
at 2:45 in Textile Room 119**
