

## Residency Policy

Department of Industrial and Systems Engineering

Spring 2003

The policy of the Graduate School of Auburn University prior to April 2003 regarding residency for MS and PhD students was:

1. for MS students, 1 term of full time enrollment on campus during the course of study.
2. for PhD students, 2 consecutive terms of full time enrollment on campus during the course of study.

The Graduate School has now passed responsibility for residency requirements down to the degree granting entities, that is, the departments. The policy of the ISE Department will be identical to the pre April 2003 policy of the Graduate School (items 1 and 2, above). In unusual circumstances, exceptions to the residency requirements for either MS or PhD will be considered by individual faculty advisors in consultation with the departmental Graduate Program coordinator and the department Chair.

The Residency Certification Form is still required by the Graduate School by all MS and PhD degree seekers and may be found at:
