Position Title: Surface Engineering Intern  
Company Division: Corporate Engineering Department  
Location: Jasper, AL  
Degree Preference: Mining, Civil or Environmental Engineer  
Degree Status: Junior or Senior  

Company Information:  
Drummond Company is a privately held natural resource, mining, and real estate development company with revenues exceeding $1 Billion. Drummond operates coal mines in Alabama and Colombia, South America and manages real-estate operations in Florida, California, and Alabama. We have a strong financial balance sheet and are growing rapidly in international scale.

Job Description  

Surface mining projects the student may be expected to perform include:  
- Performing capital cost analysis, budgets, feasibility studies  
- Laying out roads, rail, facilities, drainage routes and ponds  
- Reviewing and documenting gasification, CTL and UCG technologies.  
- preparing layout site/grading plans for facilities  
- preparing volume estimates of earthwork, piping and materials  
- coordinating and managing designs and communicating with other design groups  
- prepare bid packages and attending pre-bid and preconstruction conferences with contractors  
- perform construction management duties  
- Reviewing, analyzing and ranking potential acquisitions based on reserve volumes, coal characteristics and location  
- Developing mine designs including mining options, pit widths, benching, spoiling, dragline range diagrams, cycling/scheduling, machine sizing  
- Analyzing coal handling logistics (haulers, loaders, transfer systems)
