How **AUBURN** engineers
DRIVE COMFORT

How **AUBURN** engineers DRIVE COMFORT

At Auburn, how you get there is as important as where you're going. Through a grant from the Hyundai America Technical Center Inc., industrial and systems engineering faculty member Woojin Park is developing automotive interiors for American drivers of all shapes and sizes. Park's "size-neutral" project drives comfortable seating posture, as well as steering wheel and gearshift ergonomics. So while you're traveling from A to B, you can enjoy the ride.
