

POLYMER AND FIBER ENGINEERING

2011 SPRING SEMINAR SERIES

2 p.m. Room 104 • Textile Building

1:45 p.m. reception • lobby

Feb. 1

Can Nanotechnology Be Fashionable?

Juan Hinstroza

Department of Fiber Science and Apparel Design

Cornell University

March 1

Cellulosic Materials At Micro- and Nanoscale Levels: Manufacturing, Characterization and Application

Siqun Wang

Center for Renewable Carbon and Department of Forestry, Wildlife and Fisheries

University of Tennessee

April 5

Elucidating the Role of Solvent in Chemical Reactions Using Simulations

Orlando Acevedo

Department of Chemistry and Biochemistry

Auburn University

April 26

Electrospinning Graded Structures for ACL Repair

Abby Whittington

Department of Materials Science and Engineering

Virginia Tech
