

POLYMER AND FIBER ENGINEERING

2010 FALL SEMINAR SERIES
Room 104 • Textile Building

Samuel Ginn College of Engineering
Auburn University

Sept. 7
2 p.m.

Gasoline and Diesel from Grasses and Plants

Ram B. Gupta

Philpott and West Point Stevens Distinguished Professor
Department of Chemical Engineering, Auburn University

Oct. 5
2 p.m.

Lipid-Based Light Energy Converting Systems

Wei Zhan

Assistant professor
Department of Chemistry, Auburn University

Nov. 2
2 p.m.

Non-polar Liquids + Nonionic Surfactants = Electric Charges?

A Surprising Recipe for Electrostatic Phenomena

Sven Holger Behrens

Associate Professor

School of Chemical and Biomolecular Engineering, Georgia Institute of Technology

Nov. 30
2 p.m.

DNA Techniques to Understand Microbial Communities

Omar Oyarzabal

Associate Professor

Department of Biological Sciences, Alabama State University

AUBURN
UNIVERSITY
