

Master of Engineering

The Master of Engineering (available fall 2018) offers an on-campus or completely online degree tailored to fit the specific needs of each students. The degree requires a coordinated program of 30 credit hours of graduate level coursework. Each student will design a plan of study and may include courses in any of the following engineering disciplines:

- ▶ Aerospace
- ▶ Chemical
- ▶ Civil
- ▶ Computer Science and Software
- ▶ Electrical and Computer
- ▶ Industrial and Systems
- ▶ Materials
- ▶ Mechanical

The plan must identify multiple outcomes, each of which should be supported by multiple courses in the plan of study. Each plan must contain at least 21 hours of 6000-level and above engineering courses.

Graduate certificates from the above disciplines may also be combined to design your degree and there is no thesis required. Research and thesis credits cannot be used to meet the requirements of this degree.

Requirements for Master of Engineering Degree

- ▶ Relevant bachelor's degree from an accredited U.S. institution. Exceptions to this could be approved if the student has the background needed to succeed in the graduate engineering courses that would be taken as part of the degree.
- ▶ GRE is not required
