The College of Engineering will offer a graduate certificate (available fall 2018, pending approval) that requires three courses (9 credit hours) and is delivered online.

Certificate Curriculum:
Students are expected to complete the following three core courses which can be earned by both degree and non-degree seeking students:

• Friction, Wear and Lubrication
• Boundary and Full-Film Lubrication
• Multiscale Contact Mechanics

Admission Requirements:
A relevant bachelor’s degree from an accredited U.S. institution is expected for admission. Exceptions to this may be approved if the student has the background needed to succeed in the graduate engineering courses. The GRE is not required.
