Tennessee Department of Environment & Conservation
and the
Southern Regional Radon Training Center

Will offer the continuing education credit

**Difficult-To-Mitigate Houses Workshop**

Rescheduled

**November 15-16, 2004**

Livingston, Tennessee

The Tennessee Department of Environment and Conservation (TDEC) – Tennessee Radon Program and the Southern Regional Radon Training Center (SRRTC) will present the **Difficult-to-Mitigate Workshop** in Livingston, Tennessee. Applications have been processed with the radon proficiency programs for participants to receive 16 hours of credit for the November 15-16, 2004 workshop. The workshop will offer vital information on diagnostics with mitigating difficult houses.

The workshop will focus on several common factors, which contribute to difficulty with design and installation of successful radon mitigation systems in houses. Some of those factors will include:

- Poor sub-slab communication
- Basement block walls
- Combination foundation types
- Competing building or soil gas pressures
- Unusual geologic or other site or building characteristics

**CLASSROOM MEETING SPACE**

The workshop will be held at the **Tennessee Technology Center, 740 High Tech Drive, Livingston, Tennessee**. All registrants will receive a confirmation package with a map and information about classroom logistics, including hotel information for the nearest hotels in Cookeville, Tennessee.

**COURSE INFORMATION**

The first class day will be spent exploring potential methods of addressing difficult-to-mitigate houses, with case studies derived from real mitigation projects. The second day will be field exercises in one or more houses, which have been used as research and demonstration sites. Exercises will cover diagnostic and design procedures.

**BRING CASE STUDIES TO THE WORKSHOP**

Participants are encouraged and invited to prepare a 15 minute presentation for the class, which may describe personal experiences in difficult to mitigate houses, preferably those situations in which innovative solutions were developed.

**TRAINING FEES**

TDEC sponsors this radon training, which allows Tennessee residents to participate at the rate of $100 for the training. If meeting space allows, out-of-state registrants may be allowed to attend the training, but must pay the $150 registration fee. Please complete the registration form and return to SRRTC – Auburn University.
CANCELLATION POLICY

We understand that circumstances might arise that could require you to cancel your registration and we make every effort to accommodate. If you cancel your registration five days prior to training you may receive a refund for training fee, minus the processing fee of $50. SRRTC/TDEC reserve the right to cancel a class and will reimburse any fees paid for the training if cancelled. We are not responsible for any travel costs incurred for this training.

REGISTRATION FORM

Difficult to Mitigate Houses Workshop
November 15-16, 2004
Livingston, Tennessee

If you have several registrants, please make photocopies and complete form for each participant.

( ) November 15-16 2004 - Tennessee Residents - $100
( ) November 15-16, 2004 - Non-TN Residents - $150
