Information Technology Seminar

Thursday, February 23, 11:00 am - 12:15 pm, 238 Broun Hall

The Microsoft next generation of Web services: Windows Communication Foundation (Indigo)

Brandon McMillon
Academic Developer Evangelist
Microsoft Corporation
Auburn University Computer Science and Software Engineering Department Alumni

What are the innovative features and limitations of today’s Web services? What is the Service-Oriented Architecture? What are the revolutionary features of the Windows Communication Foundation (Indigo), the Microsoft next generation of Web services that will ship with Windows Vista? These are only few of the new Microsoft technologies topics covered in this seminar organized by Computer Science and Software Engineering Department. For more information contact Daniela Marghitu (daniela@eng.auburn.edu).
