Auburn University
Department of Industrial & Systems Engineering

-------------------------------------------------------------------------

Assistant Professor

-------------------------------------------------------------------------

Applications are invited for one tenure-track faculty position (Assistant Professor) beginning August 16, 2007. Individuals are sought with background and experience in occupational ergonomics, biomechanics and/or human factors. Exposure to the public health community and an understanding of occupational injury prevention are preferred. The successful applicant will teach courses and conduct research and will participate fully in the CDC/NIOSH funded Center for Occupational Safety and Ergonomics; this is a joint Center between Auburn University and the University of Alabama – Birmingham. An earned doctoral degree in industrial engineering, or closely aligned field, is required.

Auburn University is in the university-oriented community of Auburn, Alabama. Together, community and university provide one of the nation’s few remaining university environments. Although Auburn is a relatively small town, it has an exemplary public school system rated in the top five in the Southeast, an excellent regional health care center, a thriving downtown business district adjacent to the campus, a regional mall and numerous shopping centers. In addition, Auburn is commuting distance from two major metropolitan areas: Columbus, Georgia (the second largest city in Georgia) and Montgomery (the capital city of Alabama). Spectator sporting events and recreational activities are plentiful, of course, but Auburn University offers truly cosmopolitan cultural events as well. Travel time to Birmingham or Atlanta is less than two hours. Please visit Auburn’s home page at www.auburn.edu for more information about Auburn University and our department.

Review of applications will begin January 1, 2007 and continue until a candidate is selected and recommended for appointment. To apply, send a letter of application, vitae, and a list of three references to: Robert Thomas, Chair of Faculty Search Committee, Department of Industrial and Systems Engineering, Auburn University, 207 Dunstan Hall, Auburn University, AL 36849-5346, rthomas@eng.auburn.edu, (334) 844-4340.

The candidate selected for this position must be able to meet eligibility requirements for work in the United States and must be able to effectively communicate in English.

Auburn University is an equal opportunity, affirmative action employer. Minorities and women are encouraged to apply.
