Birmingham
June 7, 2023

About 100,000 crashes occur in work zones every year, according to the National Work Zone Safety Information Clearinghouse. An annual average of 764 traffic fatalities and 135 worker deaths occurred in work zones in the U.S. from 2015 to 2017. These numbers are on the rise. In Alabama, there has been an average of 20 work zone traffic fatalities and 5 worker deaths per year. There is room for improvement.

This workshop will strengthen the knowledge base of anyone involved in the design, implementation, inspection, and maintenance of temporary traffic control (TTC). This workshop includes a series of hands-on activities and exercises intended to reinforce the learning at a higher level of application. After attending the workshop, participants should be able to use the Manual on Uniform Traffic Control Devices (MUTCD), identify relevant state and federal guidelines and practices pertaining to TTC, identify characteristics of traffic control suitable for use in work zones, and select and install appropriate TTC layouts for specific situations. This workshop should be of interest to contractors, and their employees, safety representatives, local and state employees, and all those whose work involves street and highway operations on or adjacent to the roadway. A copy of Part 6 of the MUTCD will be provided.

Workshop Topics

- Responsibilities and Requirements for TTC
- Elements of Traffic Control and TTC Zones
- Typical TTC Activities and Applications
- Tools, Tips, and Resources for TTC

Please register at www.eng.auburn.edu/atap. **CLASS SIZE IS LIMITED TO 30 PARTICIPANTS PER LOCATION. The cost of the workshop is \$175.00.** Registrants are reminded that registration is not complete until payment is made. The registration fee includes handout materials, break refreshments, lunch, and a certificate of participation. Participants completing this workshop will receive .60 Continuing Education Units (CEUs), 6.0 Professional Development Hours (PDHs). Thank you for your continued support of the Alabama Transportation Assistance Program.

Workshop Instructor

Rod Turochy, Ph.D.

Rod E. Turochy is the James M. Hunnicutt Professor of Traffic Engineering in the Department of Civil and Environmental Engineering at Auburn University, where he has been since January 2002. After directing the Alabama Local Technical Assistance Program (LTAP) and other related projects under the umbrella of the Alabama Transportation Assistance Program (ATAP) for four years, he now serves as the Associate Director for Outreach for the Auburn University Transportation Research Institute. He earned his bachelors and master's degrees at Virginia Tech and a Ph.D. at the University of Virginia, all in civil engineering. Dr. Turochy also has four years of work experience with the Virginia Department of Transportation; in his last role with VDOT, he managed work zone safety for the Salem District. He is a licensed engineer in Alabama and Virginia.

Cancellation Policy

We understand that circumstances may arise that could require you to cancel your registration, and we make every effort to accommodate your needs. Due to commitments to our instructors and facilities, the registration fee is not refundable if a registrant withdraws less than five working days before the workshop. You may substitute registrants; please notify us in advance if possible. Non-paid, no show registrants will be invoiced for the full cost of the workshop. ATAP reserves the right to cancel or modify any program offering, but will provide registrants the option of a full refund. Auburn University will not be responsible for expenses incurred by a registrant as the result of a cancelled or rescheduled workshop.
