

**ALABAMA HIGHWAY SAFETY IMPROVEMENT PROGRAM**

The Highway Safety Improvement Program (HSIP) is a core Federal-aid program with the purpose to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned roads and roads on tribal land. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads with a focus on performance.

Contact ALDOT’s Operations and Safety Office for most up to date application and program files. It is highly recommended that the sponsor coordinate with the appropriate ALDOT Region in regard to funding priorities within the Region.

**ELIGIBILITY:**

The program is open to all local and state public agencies. The proposed project must meet the following criteria:

- The proposed project must address a stated goal(s) of the Alabama Strategic Highway Safety Plan, including the reduction of crashes, fatalities, injuries or property damage in support of the State’s established safety performance measures.
- There must be a documented description of the safety issue(s) along with supporting data and quantitative and/or qualitative information on the proposed safety countermeasures.
- A project sponsor(s) must be identified who is willing to implement the project according to federal and ALDOT guidance and requirements.
