Aims and Scope

The Journal of Electronic Testing: Theory and Applications is an international forum for the dissemination of research and application information in the area of electronic testing. The selection of papers for publication is through peer reviews to ensure originality, timeliness and relevance. The journal provides archival material, and through its quick publication cycle, brings recent results to researchers and practitioners. It is the only research journal exclusively devoted to electronic testing.

The application domain of the published articles is electronic circuits and systems used for computing and communications. Broadly, the topics include hardware testing, verification, design for testability, reliability and security.

Prospective authors can electronically submit original contributions as full papers or six-page letters at the website <https://www.editorialmanager.com/jett/>
